## SUMMARY

MCA student with a background in Java-based backend development and frontend web technologies. Has built projects across AI-powered resume analysis, live agricultural market analytics, and full-stack web applications. Brings prior internship experience working on real client projects in a professional team environment. Comfortable across the stack from Spring Boot APIs and database design through to responsive frontend interfaces.

## EDUCATION

|                                                                                                   |             |
|---------------------------------------------------------------------------------------------------|-------------|
| <b>BVIMIT, Mumbai University, Navi Mumbai</b><br>Master of Computer Applications (MCA) - Pursuing | 2025 – 2027 |
| <b>RTM Nagpur University, Nagpur</b><br>Bachelor of Commerce in Computer Applications - 71%       | 2021 – 2024 |
| <b>Hislop College, Nagpur</b><br>Higher Secondary Certificate – 85.33%                            | 2019 – 2021 |
| <b>Pt. Baccharaj Vyas Vidyalaya, Nagpur</b><br>Secondary School Certificate – 72.40%              | 2019        |

## SKILLS

**Languages:** Java, C++, JavaScript, SQL  
**Frontend:** HTML5, CSS3, Bootstrap, ReactJS, Thymeleaf  
**Backend:** Spring Boot, Spring Security, JPA, REST APIs, JWT Authentication, Microservices  
**AI Integration:** Spring AI, LLM Integration, RAG Basics  
**Databases:** MySQL, PostgreSQL, Oracle  
**Testing:** Selenium WebDriver  
**Tools:** Git, Docker, Maven, Postman, Jira  
**Deployment:** Apache Tomcat, Vercel, Netlify, GitHub Pages  
**Core Concepts:** OOP, Java Collections, JDBC, Exception Handling, Multithreading, DSA

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                            |

| <ul style="list-style-type: none"><li>Collaborated with designers to build clean, responsive interfaces for corporate clients worked within a structured team managing large-scale design and front-end development projects.</li><li>Optimized website performance by refining asset loading and minimizing render-blocking resources contributing to faster page load times across client projects.</li><li>Researched and applied frontend solutions to improve usability and interface consistency across client deliverables.</li></ul> |                                            |

## PROJECTS

---

### Company Internship Website Design (Live) | HTML, CSS, Bootstrap, JavaScript

- Designed and developed a professional company website showcasing services and information.
- Built a responsive layout using Bootstrap to ensure compatibility across devices.
- Optimized website performance and accessibility by using clean code structure, responsive

### AI Resume Screening & Mock Interview Generator | Java, Spring Boot, Spring AI, REST APIs

- Developing an AI-powered system that analyzes resumes and extracts skills, projects, and technologies.
- Implemented dynamic generation of mock interview questions based on the candidate's skillset.
- Designed backend APIs for resume processing, skill extraction, and quiz generation.

### AgroLive - Crops & Commodities Price Analytics | Java, Spring Boot, Spring Security, PostgreSQL

- Built a platform that tracks and displays live crop and commodity price trends with data visualization features
- Implemented Spring Security for access control and designed a responsive interface for presenting real-time market.

### Bike Rental Web Application | Servlet, JSP, JDBC, HTML, CSS, Bootstrap

- Developed a web application for bike rentals with real-time availability and booking features.
- Implemented user authentication and an admin panel for managing rentals and inventory.
- Designed a responsive interface to improve user experience and booking flow

## CERTIFICATIONS

---

- **Programming in Java** NPTEL / IIT Kanpur
- **Selenium Automation Testing** QSpiders, Pune
- **Industrial Training in Java** Codeline Institute, Nagpur

## SEMINARS & WORKSHOPS

---

- **Cloud Computing Bootcamp**

Google Developer Student Clubs Bootcamp

Completed a 7-day technical bootcamp focused on modern development practices and cloud computing.

## ACHIEVEMENTS

---

- **Coding Competition K.D.K. College** Ranked 1<sup>st</sup> among 100+ participants in an inter-college coding competition.
