MCA student with a strong foundation in Java-based backend development and frontend web technologies. Experienced in building projects involving AI-powered resume analysis, agricultural market analytics, and full-stack web applications. Gained internship experience working on real-world client projects in a professional team environment. Skilled in developing Spring Boot REST APIs, database-driven applications, and responsive web interfaces.

EDUCATION

BVIMIT, Mumbai University, Navi Mumbai Master of Computer Applications (MCA) – Pursuing	2025 – 2027
RTM Nagpur University, Nagpur Bachelor of Commerce in Computer Applications – 71%	2021 – 2024
Hislop College, Nagpur Higher Secondary Certificate – 85.33%	2019 – 2021
Pt. Baccharaj Vyas Vidyalaya, Nagpur Secondary School Certificate – 72.40%	2019

SKILLS

Languages: Java, C++, SQL
Frontend: HTML5, CSS3, Bootstrap
Backend: Spring Boot, Spring Data JPA, REST APIs, JWT Authentication
AI Integration: Spring AI, LLM Integration
Databases: MySQL, PostgreSQL, Oracle
Testing: Selenium WebDriver
Tools: Git, Docker, Maven, Postman
Deployment: Apache Tomcat, Vercel, Netlify, GitHub Pages
Core Concepts: OOP, Java Collections, Exception Handling, Multithreading

EXPERIENCE

Robowaves Backend Developer Intern	Oct 2024 – Jan 2025 Pune, Maharashtra
- Developed and maintained backend features using Java, Spring Boot, and REST APIs for enterprise web application. - Designed and developed a desktop application using Java Swing, implementing intuitive GUI components to deliver a seamless user experience.	
Asterisc Technocrat Pvt. Ltd. Frontend Web Developer	Feb 2023 – Aug 2023 Nagpur, Maharashtra
- Collaborated with designers to build clean, responsive interfaces for corporate clients; worked within a structured team managing large-scale design and front-end development projects. - Optimized website performance by refining asset loading and minimizing render-blocking resources, contributing to faster page load times across client projects. - Researched and applied frontend solutions to improve usability and interface consistency across client deliverables.	

PROJECTS

Company Internship Website Design (Live) | *HTML, CSS, Bootstrap, JavaScript*

- Designed and developed a professional company website showcasing services and information.
- Built a responsive layout using Bootstrap to ensure compatibility across devices.
- Optimized website performance and accessibility using clean, responsive code structure.

MindScreen– AI Resume Screening & Mock Interview Generator | *Java, Spring Boot, Spring AI, REST APIs*

- Developing an AI-powered system that analyses resumes and extracts skills, projects, and technologies.
- Implemented dynamic generation of mock interview questions based on the candidate's skillset.
- Designed backend APIs for resume processing, skill extraction, and quiz generation.

AgroLive – Crops & Commodities Price Analytics | *Java, Spring Boot, Spring Security, PostgreSQL*

- Built a platform that tracks and displays live crops and commodity price trends with data visualization features.
- Implemented Spring Security for access control and designed a responsive interface for presenting real-time market data.

Bike Rental Web Application | *Servlet, JSP, JDBC, HTML, CSS, Bootstrap*

- Developed a web application for bike rentals with real-time availability and booking features.
- Implemented user authentication and an admin panel for managing rentals and inventory.
- Designed a responsive interface to improve user experience and booking flow.

CERTIFICATIONS

- **Programming in Java** — NPTEL / IIT Kharagpur
- **Selenium Automation Testing** — QSpiders, Pune
- **Industrial Training in Java** — Codeline Institute, Nagpur
- **Generative AI Fluency** — Future Skills

SEMINARS & WORKSHOPS

Cloud Computing Bootcamp — Google Developer Student Clubs

Completed a 7-day technical bootcamp focused on modern development practices and cloud computing.

HACKATHON PARTICIPATION

- **UAI Hackathon** — Participated in a hackathon at Universal AI University, developing an innovative AI-based solution focused on solving real-world problems.
- **Hack the Core** — Participated in a cybersecurity-focused hackathon, developing a packet-filtering solution to monitor and filter suspicious network traffic and strengthen network security.

ACHIEVEMENTS

Coding Competition – K.D.K. College: Secured 1st Rank among 100+ participants in an inter-college coding competition.
